Research Experiences in Computational Science, Engineering and Mathematics (RECSEM) Program

This on-site program at the University of Tennessee (UTK) directs students to explore emergent computational science models, methods in data analytics, and software in deep learning. Ten additional international students from Hong Kong also participate in this program. Students work together to achieve their research goals, and share a unique opportunity for trading academic experiences, exploring scientific ideas, and enjoying social activities in this ten-week program.

Benefits and Activities

- Paid position + Paid Housing
- HPC and Deep Learning research experiences
- Multicultural exchange with Hong Kong students
- Trips to Great Smokey Mtns, Knoxville zoo, Fall Creek Falls, etc.
- GPUs programming, Supercomputer access

Application Deadline: March 15  (Duration May 27 – Aug. 3)
