CS Professor Chairs CPS-IoT Week Conference

The 22nd ACM International Conference on Hybrid Systems: Computation and Control held as part of the Cyber-Physical Systems and Internet of Things Week (CPS-IoT Week) at Montreal, Canada between April 16-18, 2019, was co-chair by Prof. Pavithra Prabhakar, Associate Professor and Peggy and Gary Edwards Chair in Engineering along with Prof. Necmiye Ozay from University of Michigan, Ann Arbor. The conference is dedicated to advancing design and analysis techniques that bridge control theory and computer science, and covers the range from theoretical results to practical applications and experiences in cyber-physical systems, mixed signal circuits, robotics, infrastructure networks, and biological models. New this year was a special track on Safe autonomy, Artificial Intelligence and Machine Learning, which was very well attended with two special sessions and an invited speaker, Dr. Guy Katz.
